

Mathematical and Statistical Consulting Center

641 Lincoln Building
Department of Mathematics and Statistics
Youngstown State University

The Mathematical and Statistical Consulting Center (MSCC), opening Spring 2015, is a new service of the Department of Mathematics and Statistics at Youngstown State University. The MSCC has the dual purpose of

1. Providing mathematical modeling and statistical consulting and data analysis services to YSU faculty, students and staff on research projects involving mathematical and statistical methods. Services that the MSCC offers are:
 - Design of experiments and surveys.
 - Manipulation of data (import/export, transformation) with statistical software.
 - Advice on proper statistical methods for studies.
 - Conduct statistical analyses.
 - Interpretation of results in statistical analyses.
 - Manuscript revision.
 - Mathematical modeling and analysis.
2. Providing experience for students in mathematics and statistics by working with real life data and modeling problems.

Associated Faculty

- Statistics: Dr. Lucy Kerns (xlu@ysu.edu)
- Mathematics: Dr. Thomas Wakefield (tpwakefield@ysu.edu)

Hours

Scheduled appointments are required and can be made by contacting the associated faculty.
